

CLASSROOM CURRICULUM

PRE-K PM CLASS: MS. NASHA

.....

MAY & JUNE 2022

Let's Go Outside

For the month of May and June, our PM classroom will be spending time outdoors. Spending time outside improves mental health and cognitive skills. Also, the children will be working together on various outdoor activities like art and physical activities, which will help their problem-solving skills and learn how to work together in a less structured environment.

Learning foundations that the children will meet:

Social and Emotional Development:

Children will learn how to work together in an open setting to perform various activities.

Cognitive Development

The children will also have to use their cognitive skills to navigate through the various activities that will include problem-solving and working with their peers.

Fine/gross motor Development

The children will be doing more physical activities outside and they will develop their fine and gross motor skills as they navigate through nature.
